

## The Evolution of Expeditionary Solutions™

# Powered. Watered. Connected. Secure. When nothing else is.

The MRU is truly the most functional, versatile, and deployable asset ever invented. It is pulled by a standard pickup and it deploys 8x24 feet of fully customizable SPACE. When the MRU is deployed, all the water, power, and communications the functionality requires are built in.

### MILITARY

- Claims Processing

### MEDICAL

- ICU
- Surgical Suite
- Laboratories
- Central Sterile Processing

## MILITARY AND TACTICAL OPERATIONS

**VERT REP** configurable, reinforced flooring for unique load placements, and ballistic coatings for small arms fire. WHS Elastic Grid™ daisy-chained power can be aggregated from solar, wind, generator, or municipality into a shared battery distribution system. This grid ensures clean, constant power for all equipment. Satellite comms and water from air or industrial filtration can be built into the grid ensuring access and reliability of all mission-critical utilities. Mold, mildew, and termite resistant, fire retardant and all terrain ready. The MRU is extremely easy to set up and insulated up to R-72.

- **VERT REP**
- **Clean Power**
- **Full Utilities**
- **Superior Durability**

## MEDICAL MOBILITY (CLINICS ON WHEELS)

The perfect solution for providing quality health care, using a mobile platform. The equivalent care you would expect from a facility delivered to the most austere environments with the least difficulty. Quick to deploy clinics and medical assets on wheels work seamlessly together to provide a continuity of care that the disaster response community needs. These units provide access to the tools that professional responders deserve to reduce suffering, expedite care, and save lives.

- **Expandable**
- **ADA Compliant**
- **Equivalent Care**
- **Medical Surge Asset**
